ACOUSTICAL SOLUTIONS

Managing Privacy in Your Work Environment

Red Thread is a leader in the evaluation and remediation of acoustical challenges. Together with our partners, we perform evaluative and post-performance testing to certify environments for acoustical privacy. We have extensive experience in a variety of spaces, from industrial and corporate to education and clinical spaces.

Our Capabilities

- **Absorption** to prevent reverberation and echoes
- **Blocking** to prevent noise from reaching unintended listeners
- **Covering / Masking** to eliminate distractions and ensure conversational privacy
- **Directional** sound to address specific listeners and remove distractions in lobbies, patient rooms, etc.
- **Shaping** sound for full fidelity AV in studios and telepresence suites
- **Third-party** design, testing, verification and periodic assessments

Sound Management Solutions

- **Sound Masking Systems** – to eliminate noise distractions and improve workplace well-being
- **Distributed Audio** – for privacy, paging and music systems
- **Vertical Wall Treatments** – demountable partitions, artwork, decorative insets, cornices, baffles, decorative banners
- **Horizontal Ceiling-Mounted Treatments** – ceiling tiles, baffles, floating clouds, sculptural elements, graphic banners
- **Floor Treatments** – acoustical flooring and carpet, raised flooring sound management
- **Measurement / Monitoring Equipment** – sensor networks, integrated feedback systems, compliance measurement
