ELECTRICAL SERVICES

Connecting Power from the Street to the Desktop

Red Thread is a full service electrical contractor with an experienced team of licensed electricians and apprentices. Whether you are constructing a new facility or seeking a partner to handle your day-to-day electrical needs, we have the people, the technology and the experience to service your organization. What differentiates Red Thread is our unique understanding of cable and power management and ability to develop custom electrical devices that meet your specific requirements. From powering your workstations, managing power distribution between building tenants, to providing generators to keep your business up and running, Red Thread is a versatile resource and partner for all of your power needs.
